

Term 4

Computing

Year 2

- An algorithm is a set of rules that a Beebot will follow.
- Debug means to find and fix an error in an algorithm.
- Decomposition means to break a task into chunks and create algorithms for each chunk.

Beebot—a robot used for coding.

prediction—making an educated guess about what might happen in the future.

debug—find and fix an error.

algorithm—set of rules.

route—a path that you set for your Beebot.

decomposition

coding—is how you communicate with a computer to tell it to do something.

Algorithms and Beebots were used in Year 1 to plan routes for a Beebot to follow.

Year 2

Salvation

Why does Easter

Easter is a Christian festival.

crucified to be put to death by hanging on a cross.

salvation being saved by Jesus.

resurrection returning back to life after dying.

saviour a person who saves people from danger or destruction.

Term 4

S

Religious Sources

Community & Living

Thinking & Reality

God & Believing

Easter is very important in the 'big story' of the Bible. Jesus showed that he was willing to forgive all people, even for putting him on the cross.

Christians believe Jesus builds a bridge between God and humans.

Christians believe Jesus rose
